**Buying direct from the manufacturer
means higher profits for you!**

Meet the newest additions to our filter line. A new, refined look and new features give these filters 'more bang for the buck' for you and your customers. These are great looking filters for salt or freshwater with no-hassle hook-up. Everything your customer needs for immediate set up is included when filters are purchased with pumps from us.

The high tech look and guaranteed perfect performance of these new filters are definite pluses for your store. Eye catching designs give these filters great shelf appeal superstores can't match. Replaceable sponges, bonded padding and airstones bring customers back again and again!

Best of all . . . you buy factory direct and we give you 'extras' that your customers often need. Our products are backed by our reputation for quality and service. We also offer *FREE SHIPPING* on our filters and most dry goods in the USA.

If we don't have what you want, we'll get it for you.

And . . . your order is there when you need it!

Dedicated to the Success of the Independent Retailer

As an independent retailer, you are the backbone of our industry.
As a quality wholesaler, our goal is to keep it that way.

We understand the pride of the small business owner and exactly what it takes to become successful. We understand how much work a fish store is, what it is like to run a fish room filled with quality livestock, and shelves stocked with all those items that customers want. And, we understand what it means to actually know something about what you sell.

For all these reasons, we structure our business around your business to give you not only the products you need at consistently low prices, but also the service and support to help you sell what you carry.

Why you should buy from Aquarium Life Support Systems

- **we help you make money - we offer consistently low prices across the board every day**
- **we sell wholesale only**
- **10-20% off every day**
- **free drop shipments**
- **free websites - expand your inventory & sales staff without costly overhead. Call today!**
- **our friendly service & dealer support have been the watchwords of our business for over 20 years**
- **we manufacture the best trickle filter in the industry**
- **we understand the meaning of value**

Most distributors work off a high book price & you spend all of your time looking for the one with the best discount or deal each week. This searching costs you time & money. We know your time is much better spent helping customers.

**Visit our website at
www.aqualifesupport.com**

At your fingertips are thousands of carefully researched products with all the important information you need to make the right buying decisions. On-line ordering is simple and secure. We even have an interactive Shopping List page for the products you buy most often so reordering is always a snap. We offer the same great service to our on-line customers that our catalog customers have depended on for years. Visit us soon! Your comments and feedback are always welcome.

NOW YOU CAN PLAY WITH THE BIG BOYS!

An Aquarium Life Support Systems Affiliate Website moves your business into the world of e-commerce with a great presence that levels the playing field.

Find out what we can do for you!

1. Your website has the look and feel of your store.
2. You save untold dollars developing and maintaining your own e-commerce site.
3. Expands your product line without costly warehousing and costly overhead.
4. Expands your sales force - in-depth treatment of important aquarium issues the require time in the store. All information is written and customers can refer to it again and again.
5. A great sales tool for employees. Information in the written material backs up what salespeople tell customers in the store making information more reliable.
6. A great training tool for employees. Coverage of important aquarium concepts gives employees the knowledge to help customers making sure all employees have the same message for customers.
7. You get a commission on every web sale.
8. Expert help in managing your website. You can adjust your web pricing up or down in the markup field on the site. We help you determine when adjustments may be necessary for your particular situation.
9. All customer service issues related to the website are handled by Aquarium Life Support Systems. You are not bothered with billing, returns or warranty issues.
10. Customers may ask if pricing on your website is different from pricing in your store. Explain to customers that they will also pay shipping costs on their on-line purchases. Your participation on the website enables you to expand your inventory and customer service without raising prices in your store to cover the overhead of maintaining the site. Your customers will appreciate using the site when it is inconvenient to visit your store or when the store is closed. Another feature customers will use frequently is the log book. Here they can keep water quality records of all their systems and receive on-line help with problems.

AQUARIUM LIFE SUPPORT SYSTEMS™

We have dedicated our business to the independent retailer. We understand the pride of the small business owner and exactly what it takes to become successful. We understand how much work a fish store is, what it is like to run a fish room filled with quality livestock, and shelves stocked with all those items that customers want. And, we understand what it means to actually know something about what you sell.

For all these reasons, we structure our business around your business to give you not only the products you need at consistently low prices, but also the service and support to help you sell what you carry.

Why you should buy from Aquarium Life Support Systems? First of all, we can help you make money. Aquarium Life Support Systems offers consistently low prices across the board every day. We don't get you hooked with a few specials then stick it to you later. Our prices are equal to getting 15-20% off every day and we have no required buying levels. Second, our friendly service and continued dealer support have been the watchwords of our business for over 10 years. And, most important, we understand the meaning of value.

Most distributors work off a high book price and you

spend all of your time looking for the one with the best discount or deal each week. This searching costs you time and money. We know your time is much better spent helping customers.

We do not cater to or help "mass merchants." We research and stock quality products that the "super stores" don't and help you compete in our highly volatile market.

Aquarium Life Support Systems manufactures the best trickle filter in the industry and the #1 exported filter to England. Products like these can give you a definite edge over the large, generally poorly informed mass

merchants.

We know the products we sell and answer your purchasing questions honestly. We help our loyal customers with fish room advice and can help design your central filtration systems.

We have dedicated our business to the independent retailer because we understand the meaning of value and the long range importance of these quality stores to the continued success of our industry.

The Truth

Ever wonder why that distributor is driving so far to service you? It's because they have to make money on someone while stabbing you in the back selling the very same products at just above cost, or less, to the mass merchants. They drive to your city to bring you an item at \$1.50 with 20% off for \$1.20 while selling the very same item to the 'superstores' for \$1.05. Thanks.

Don't just visit our website - use it!

We designed this site for you to arm you with all the information you need to make good buying decisions. With everything at your fingertips, getting this crucial information is quick and accurate.

Check out our frequent on-line-only specials!

Ordering is quick and secure and we've added a convenient, personalized shopping list that you can update as often as you like for the products you order most often.

We cater only to you, the independent retailer, and we believe stores like yours are the backbone of our great hobby. We want your business and we deliver the commitment, service and support to earn it.

How to Use Aquarium Life Support Systems WebSite

Log on to www.aqualifesupport.com

- **If you're already a customer:**

Call or e-mail us and we will give you your screen name and a temporary password. When you go to our web site click the Log In button in the upper left of the home page. It will take you to the log-in screen. After you have entered your new screen name and your temporary password the site will display wholesale prices. You will notice the Log In button changes to "Edit My Info." It is important that you click on this and edit your password. This needs to be a password only for you. This will keep anyone but you from viewing prices to protect your wholesale status. You can also edit any of your account information from this screen.

- **If you're a new customer:**

Go to the How to Order page, download and print a Dealer Account form. Fill out this form completely and mail or FAX it to us. We will notify you when we have reviewed your information and set you up as a dealer and give you a screen name and temporary password. When you return to the site you will log by clicking the Log In button in the header section below the Aquarium Life Support Systems logo. When the log in screen appears, enter your screen name and your password. You will notice the Log In button changes to "Edit My Info." It is important that you click on this and edit your password. This needs to be a password only for you. This will keep anyone but you from viewing prices to protect your wholesale status. You can also edit any of your account information from this screen. Once you are logged in you will be able to view pricing information and place your orders.

**Remember, you can send your customers to our site
but they will never see prices.**

My Shopping List

A feature you might find useful is the Shopping List. This personalized list can be used for the products you use and order most often or as a method of keeping a list of products you might be interested in carrying later. Items can be added to the list from the Product Listing and Product Detail pages. You can view your list by clicking the Shopping List link in the header. From the Shopping List page you can order items by simply clicking them to the shopping cart, saving you time. You can also delete items from this page.

Our goal is to make your shopping experience simple, convenient and quick.
Please contact us if you experience any problems.

MR500 TRICKLE FILTER

This all clear, acrylic trickle filter is designed for use with submersible pumps such as the Danner Mag Drive Series or the Aquus pump line. With easy hook up and installation, this Aquarium Life Support Systems trickle filter is quality and superior performance at an economical price. The slim, compact design makes the MR500 not only economical, but space efficient for smaller systems and in cabinets where space is limited. Though small and efficient, there's no sacrifice in quality or workmanship here. The MR500 is perfect for 20~60 gallon systems.

The filter incorporates a unique removable sponge wall that can be used for an additional sponge to increase the handling capacity or as a place to drain a skimmer, thus preventing bubbles from entering the sump. Carbon chemical filter placement is a breeze. Specially designed media cham-

bers handle carbon such as Chemi-Pure as well as phosphate removers. Carbon and a filter bag are supplied with the MR500.

The special high surface area biological media gives the MR500 unparalleled surface area in a compact space. A precision skimmer drain is machined into the media wall allowing skimmer water to pass through the media to the sponge, thus eliminating the bubble problems often associated with protein skimmers. Filters include media unless otherwise indicated. RR denotes reef ready hookup - no return nozzle, includes 3/4" & 1" vinyl tubing. Filters without RR notation include 1/2" LocLine® return, 9/16" & 1" vinyl tubing.

MR500 Filter includes:

- LocLine® return nozzle
- Bonded pre-filter padding
- Vented Bio Media chamber
- 1" flexible vinyl tubing - 36"
- 9/16" flexible vinyl tubing - 60"
- Instructions & plumbing diagrams

Specifications:

Dimensions: 20" x 7.5" x 14" & fittings

Inlets: Single 1"

Sump capacity: 8.5 gallons

Recommended Flow Rates: 300-500gph

Standard Features:

- Pre-filter drip plate with safety overflow port
- Secondary sponge filter
- Chemical media chamber above sponge
- Carbon and filter bag included
- Special high surface area biomedial
- Ample sump area for reactors, skimmers and heaters
- Water Level Indicator
- Low sump height for easy cleaning & maintenance
- Fits most cabinets & stands
- Lifetime warranty

MR500 TRICKLE FILTER Options

- 1/2" Flap Check Valve #5050

● MR500 - #AL500 as above

- **MR500RR - #AL501**, for reef-ready hook up, no
return, 3/4" and 1" tubing.

P1000 TRICKLE FILTER

The P1000 is the perfect filter for systems up to 100 gallons. With all the same features of our larger units, the P1000 filter's better performance and higher quality place it at the top of its class. The filter is designed for use with submersible pumps such as the Danner Mag Drive Series.

The unique pre-filter over the drip plate is suspended above the drain holes to prevent clogging. The drip plate has a safety overflow port and is deep enough for chemical media, in addition to the proprietary pre-filter pads supplied. The white Sintra® lid over the drip plate helps silence the unit. Clear acrylic lids are optional.

The BioFlow media with its higher void space and sweeping surfaces far outperform spiked balls. The unit's secondary sponge filter can be placed beneath the media for conserving sump space, in the sump area using the partition wall, or in the sump with carbon above it for draining a protein skimmer, like the Model 22V. For heavily loaded systems or for just increasing the filtration capacity of the filter, a second sponge can be added giving the unit an unmatched dual sponge post filter configuration.

With easy hook up and installation, this Aquarium Life Support Systems filter is unrivaled quality and superior performance at an economical price from a company you can count on. Like all of our filters, the P1000 is constructed from the 1/4" cast acrylic with the superior design, workmanship and features our customers have come to expect, and are backed up with a Lifetime Warranty. Despite the claims, no other filters perform better or longer. Make no compromises. Buy the best.

Filters include media unless otherwise indicated. RR denotes reef ready hookup - no tank return, includes 3/4" and 1" vinyl tubing. Filters without the RR notation ship with a 1/2" LocLine® return, 9/16" & 1" vinyl tubing.

P1000 Filter includes:

- Advanced LocLine® Return
- Proprietary pre-filter pads
- Vented Bio Media chamber
- 1" flexible tubing - 36"
- 9/16" flexible tubing - 60"
- Instructions & plumbing diagrams

Specifications:

- Dimensions:** 24" x 9.5" x 14" & fittings
- Inlets:** Single 1"
- Media capacity:** 3.5+ gal
- Recommended Flow Rates:** 500-800gph

Standard Features:

- Pre-filter drip plate with safety overflow
- Secondary sponge filter
- Carbon wall support rails built in
- Sponge partition wall for sponge placement in forward sump or for dual sponge configuration
- Special high surface area biomedica
- Ample sump area for reactors, skimmers and heaters
- Water Level Indicator
- Low sump height for easy cleaning & maintenance
- Fits most cabinets & stands
- Lifetime warranty

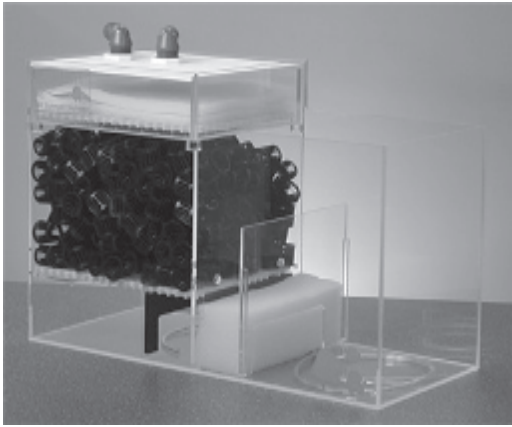

P1000 - #AL1000 with media, 1/2" Advanced LocLine® Return, 9/16" and 1" tubing.

P1000 - #AL4650 no media, 1/2" Advanced LocLine® Return, 9/16" and 1" tubing.

P1000RR - #AL3457, for reef-ready hookup, no return, 3/4" and 1" tubing.

Like all of our filters, the P1200 is constructed from the 1/4" cast acrylic with the superior design, workmanship and features our customers have come to expect, and are backed up with a Lifetime Warranty. Despite the claims, no other filters perform better or longer. Make no compromises. Buy the best.

Filters Include media unless otherwise indicated. RR denotes reef ready hookup - no tank return, includes 3/4" and 1" vinyl tubing. Filters without the RR notation ship with a 1/2" Advanced LocLine® Return, 9/16" and 1" vinyl tubing.

P1200 Filter includes:

- Advanced LocLine® Return
- Proprietary pre-filter pads
- Vented Bio Media chamber
- 1" flexible tubing - 36"
- 9/16" flexible tubing - 60"
- Instructions & plumbing diagrams

Specifications:

- Dimensions:** 24" x 10.5" x 16" & pipe fittings
- Inlets:** (2) 1"
- Media capacity:** 5 gallons
- Recommended Flow Rates:** 500-1000gph

Standard Features:

- Pre-filter drip plate with safety overflow
- Secondary sponge filter
- Carbon wall support rails built in
- Sponge partition wall for sponge placement in forward sump or for dual sponge configuration
- Special high surface area biomedial
- Ample sump area for reactors, skimmers & heaters
- Water Level Indicator
- Low sump height for easy cleaning & maintenance
- Fits most cabinets & stands
- Lifetime warranty

P1200 - #AL120 with media, 1/2" Advanced Return, 9/16" and 1" tubing.

P1200 - #AL3366 w/o media, 1/2" Advanced Return, 9/16" and 1" tubing.

P1200RR - #AL3074, for reef-ready hook up, no return, 3/4" and 1" tubing.

● See Page 2 for P1200 Package Deals ●

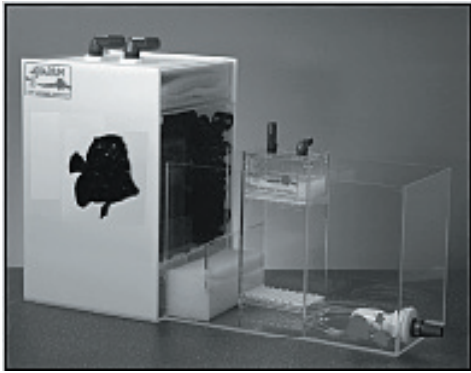

P1200 & P1200RR TRICKLE FILTER Options

- 1/2" Flap Check Valve, #5050
- 1/2" Advanced LocLine® Return, #AL3024
- 3/4" Advanced LocLine® Return, #AL AL4858
- Additional Sponge #HA476 - for replacement or using a dual sponge configuration
- 22V Protein Skimmer, #AL3488
- 1" Tank Adapter factory installed for external pump use, #AL2203
- Model G Reactor, #AL2229
- Clear Lid For Drip Plate, #AL100

P1200 TRICKLE FILTER Package Deals

- **P1200 Package #1 - #AL2894**
This package contains everything needed to hook up a UP1200 to aquariums up to 130 gallons. This great package uses a 700gph submersible pump so it runs quieter using less electricity.
UP1200 Package Deal #1 includes:
1 - #AL3074 - P1200 with Media
1 - #AL2205 - Micro Siphon Box
1 - #DA4427 - Mag Drive 7 Pump, 700gph
1 - #5068 - 1/2" Female Adapter, Insert x Fipt
1 - 1/2" Advanced Return, AL3024
- **P1200 Package# 2 - #AL2895**
This package contains everything needed to hook up a UP1200 to tank up to 130 gallons. This great package uses a 700gph submersible pump so it runs quieter using less electricity and a venturi protein skimmer.
1 - P1200 with Media #AL120
1 - #AL2205 - Micro Siphon Box
1 - #DA4427 - Mag Drive 7 Pump, 700gph
1 - #5141 - 1" Plug, Mipt
1 - #5068 - 1/2" Female Adapter, Insert x Fipt
1 - #AL3488 - 22V Protein Skimmer
1 - 1/2" Advanced Return #AL3024
- **P1200 Package# 3 - #AL2899**
The best trickle filter in its class, a great venturi skimmer and the best external pump on the market make up this package. Use on any reef-ready or drilled tank or with a siphon box (not included). For systems up to 130 gallons. A great package for use with a larger UP100 Siphon Box if needed - the best siphon box on the market. Includes all plumbing for hook up.
1 - #AL3074 - P1200RR with Media
1 - #AL3488 - 22V Protein Skimmer
1 - #DA7182 Mag 9.5 Pump, 950gph
1 - #5069 - 3/4" Female Adapter, Insert x Fipt
1 - #5095 - 3/4" Combo 90, Insert x Mipt
1 - #5146 - 3/4" tubing

UP1700 TRICKLE FILTER

The UP1700 has been our best selling trickle filter for years, and, like all our filtration products, the UP1700 is backed by quality, customer support and an established and trusted name in the industry. The ivory white acrylic construction is gorgeous and doesn't show water spots while its low profile sump makes it the easiest filter on the market to maintain. Recommended for use on aquariums up to 170 gallons. The UP1700 has room for a heater and additional media such as ChemiPure® or PolyFilter®. All plumbing for set up is included. See why these are the best filters in the industry.

The unique pre-filter over the drip plate is suspended above the drain holes to prevent clogging. The drip plate has a safety overflow port and is deep enough for chemical media, in addition to the proprietary pre-filter pads supplied. The white Sintra® lid over the drip plate helps silence the unit. Clear acrylic lids are optional.

The BioFlow media with its higher void space and sweeping surfaces far outperforms spiked balls. The secondary sponge is made from superior material and is designed unlike any other foam filter sponge on the market. The sponge is easily removed for cleaning - simply pull, rinse and replace.

The Model G Reactor, a feature not found in other filters on the market, is the perfect media chamber - a great place for additional biological, chemical or mechanical media. The Model G comes with a special high flow lid and integrated drip plate as well as its own pump*. The high flow lid is an ideal drain for skimmers like the Model 22V or the unequalled 44V Magnum Protein Skimmer.

The UP1700 incorporates a unique heater cut out to accommodate either an Ebo Jaeger or titanium heater, for easy placement under the media tower. The angled sumps of inferior filters make heater placement underneath the media impossible. Air injection is another innovative feature of the UP1700 not found in other manufacturers' lesser models. A customer supplied air pump improves the efficiency of the filter by dissipating CO₂ while increasing dissolved oxygen levels. This evaporative cooling also helps reduce excess heat from high intensity lights, pumps, etc. Bleed off of ammonia and phosphate reduction are additional benefits.

With easy hook up and installation, this Aquarium Life Support Systems filter is unrivaled quality and superior performance at an economical price from a company you can count on. Like all of our filters, the P1700 is constructed from the 1/4" cast acrylic with the superior design, workmanship and features our customers have come to expect, and are backed up with a Lifetime Warranty. Despite the claims, no other filters perform better or longer. Make no compromises. Buy the best.

Filters include media unless otherwise indicated. RR denotes reef ready hookup - no tank return, includes 3/4" and 1" vinyl tubing. Filters without the RR notation ship with a 1/2" LocLine® return, 9/16" and 1" vinyl tubing.

*Some package deals do not include the pump for the Model G if it is not required.

UP1700 Filter includes:

Advanced Locline® Return

UP2000 TRICKLE FILTER

The UP2000 offers the advanced features every high tech enthusiast needs while providing room for expansion. The large sump area easily accommodates reactors and skimmers. This unit's beautiful black design fosters beneficial bacteria to maximum efficiency in the bio tower. Perfect for up to 225-gallon systems, this incredible unit offers dual inlets for adding a second siphon box or overflow. With a list of standard features that rivals any other filter on the market, the UP2000 with great looks, expandability, and top quality construction, leads the pack.

The unique pre-filter over the drip plate is suspended above the drain holes to prevent clogging. The drip plate has a safety overflow port and is deep enough for chemical media, in addition to the proprietary pre-filter pads supplied. The white Sintra® lid over the drip plate helps silence the unit. Clear acrylic lids are optional.

The BioFlow media with its higher void space and sweeping surfaces far outperforms spiked balls. The secondary sponge is made from superior material and is designed unlike any other foam filter sponge on the market. Located beneath the media for conserving sump space, the sponge is easily removed for cleaning - simply pull, rinse and replace.

The Model G Reactor, a feature not found in other filters on the market, is the perfect media chamber - a great place for additional biological, chemical or mechanical media. The Model G comes with a special high flow lid and integrated drip plate as well as its own pump*. The high flow lid is an ideal drain for skimmers like the Model 22V or the unequalled 44V Magnum Protein Skimmer.

The UP2000 incorporates a unique heater cut out to accommodate either an Ebo Jaeger or titanium heater, for easy placement under the media tower. The angled sumps of inferior filters make heater placement underneath the media impossible. Air injection is another innovative feature of the UP2000 not found in other manufacturers' lesser models. A customer supplied air pump improves the efficiency of the filter by dissipating CO₂ while increasing dissolved oxygen levels. This evaporative cooling also helps reduce excess heat from high intensity lights, pumps, etc. Bleed off of ammonia and phosphate reduction are additional benefits.

With easy hook up and installation, this Aquarium Life Support Systems filter is unrivaled quality and superior performance from a company you can count on. Like all of our filters, the UP2000 is constructed from the 1/4" cast acrylic with the superior design, workmanship and features our customers have come to expect, and are backed up with a Lifetime Warranty. Despite the claims, no other filters perform better or longer. Make no compromises. Buy the best.

Filters include media unless otherwise indicated. RR denotes reef ready hookup - no tank return, includes 3/4" and 1" vinyl tubing. Filters without the RR notation ship with a 1/2" LocLine® return, 9/16" and 1" vinyl tubing.

*Some package deals do not include the pump for the Model G if it is not required.

T-2000 TRICKLE FILTER

The T-2000 and T-3000 filters are designed for large saltwater and freshwater aquarium systems ranging from 200 to 800 gallons. Each model is designed to handle the high demands of larger aquariums and its adaptability proves itself time and time again. Constructed of clear cast material, the T-2000 conforms to the same rigorous standards of all Aquarium Life Support Systems filters.

Standard Features:

- Secondary sponge filter
- Removable media tower
- Prefilter drip plate with safety overflow
- Accessible, vented media chamber with air injection
- Carbon chamber
- Accessible, expandable sump
- Large area in sump for additional reactors
- Probe holder rack with foam collection cup
- Bonded padding prefilter
- Advanced multi-directional return
- Low sump height for easy cleaning & maintenance
- Fits most reef-ready stands
- Lifetime Year warranty

The T-2000 unit includes:

- 1" flexible tubing
- 9/16" flexible tubing
- Check valve
- Plumbing
- Plumbing diagrams
- Instruction manual

Specifications:

Dimensions: 32^{1/2} X 15^{1/2} X 23^{1/4} & pipe fittings

Inlet: (2) 1"

Outlet: 1" tank adapter

Media capacity: 15 gallons

Handling capacity: up to 250 gallons

Recommended Flow rates: 850-1400gph

Filter Options

- Protein Skimmers
- Siphon Boxes
- Pumps
- Reactors
- Custom Inlets & Outlets
- Additional Plumbing

Add a Skimmer . . .

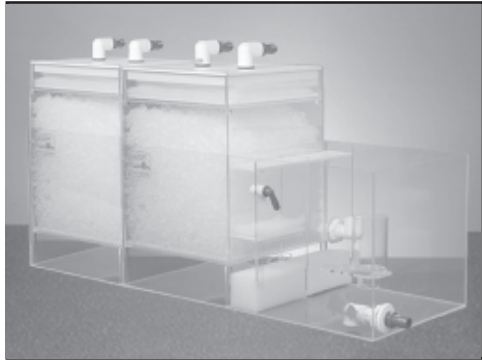

The 44V Magnum Skimmer is a great choice for the T-Series Filters. When purchased with the filter any modifications needed for custom installations is included at no additional charge.

T-3000 TRICKLE FILTER

The T-2000 and T-3000 filters are designed for large aquarium systems ranging from 200 to 800 gallons. Each model is designed to handle the high demands of larger aquariums and its adaptability proves itself time and time again.. The T-3000 has two removable media towers making it ideal for multiple tank situations or store use. Constructed of clear cast material, both the T-2000 and the T-3000 conform to the same rigorous standards of all Aquarium Life Support Systems filters.

Standard Features:

- Secondary sponge filter
- Removable media tower
- Prefilter drip plate with safety overflow
- Accessible, vented media chamber with air injection
- Carbon chamber
- Accessible, expandable sump
- Large area in sump for additional reactors
- Probe holder rack with foam collection cup
- Bonded padding prefilter
- Advanced multi-directional return
- Low sump height for easy cleaning & maintenance
- Fits most reef-ready stands
- 2-Year warranty

The T-3000 unit includes:

- 1" flexible tubing
- 9/16" flexible tubing
- Check valve
- Plumbing
- Plumbing diagrams
- Instruction manual

Specifications:

Dimensions: 47 ¹/₂ X 15 ¹/₂ X 23 ¹/₄ & pipe fittings

Inlets: (2) 1"

Outlet: 1" tank adapter

Media capacity: 30 gallons

Handling capacity: up to 800 gallons

Recommended Flow rates: 1050-2500gph

Filter Options

- Protein Skimmers
- Siphon Boxes
- Pumps
- Reactors
- Custom Inlets & Outlets
- Additional Plumbing

Add a Skimmer . . .

The 44V Magnum Skimmer is a great choice for the T-Series Filters. When purchased with the filter any modifications needed for custom installations is included at no additional charge.

Sump Top Off System

#AL3489

SIPHON BOXES

UP100 SIPHON BOX

Our UP100 Siphon Box is unique to the industry. The units are designed not only to pre-filter your water to maximum efficiency but also to expand the capacity of your system. The UP100 allows the addition of multiple layers of bonded padding for pre-filtration and the lower, expanded chemical chamber has room for chemical and biological filtration media. We also carry a high quality ceramic media that is ideal in this application. Each unit has a safety overflow feature which lets water bypass the media should it become clogged. With the removal of the post drip plate, the UP100 will handle higher flow rates. The UP100 adds an additional 25-40 gallons to the handling capacity of any of our filters.

Although the units come standard with two siphon tubes, we offer a range of tube sizes and additional tubes can be ordered. We recommend siphon tubes rather than a built-in design for easy removal and cleaning of the algal deposits associated with highly lighted saltwater systems. The UP100 alone is equivalent to most hanging-type filters. We have added a lid and redesigned the media chamber for quieter operation.

#AL2985

Features

- 2 siphons (3 optional)
- Carbon area
- Biological area
- Black inner box
- Leveling screws
- 1.5 gallons additional biological media
- Multiple bonded filter pre-filter
- Leveling screws
- 2 1" holes standard - plug included
- Lid
- Dimensions: 12 X 4^{1/2} X 15^{1/4}

Option:

- Three siphon tube Lid

#AL2205

MICRO SIPHON BOX and Lid

The Micro Siphon Box is available to the aquarist who wants just a prefilter or simply an overflow and doesn't need the expanded features of the UP100. The Micro Siphon Box is an economical system package when teamed with the UP1000 or P500. Use two boxes for higher flow rate larger systems. A pre-filter sponge is included standard. Optional lid available.

Dimensions: 6-3/4 X 3 -1/2 X 11-1/4".

Protein Skimmers

#AL3458

Model 22R Skimmer

This high performance skimmer is counter current air driven. A wooden air stone gives maximum bubble count and the unique base provides stability. Requires a water source and air pump, not included. The 22R is perfect for skimming prior to a trickle filter. Hook up and instructions are included that describe how to drain water into the skimmer, which is not possible with Venturi Skimmers. Top cup is removable for easy access and cleaning. 1/2" inlet and outlet that includes water height adjustment unit. Height is 21".

Model 32R Skimmer #AL2218

Model 44R Skimmer #AL2219

Model 22V Skimmer

This skimmer is venturi driven. Unique injection side venturi pump (included) provides optimal bubble count and water source for this unit. Everything for maximum performance is included. Drain over a sponge to prevent bubble flow into the filter.

The unique base provides stability when filled with water. Top cup is removable.

1/2" inlet and outlet that includes water height adjustment unit.

Height is 21"

#AL3488

#AL2221

Bubble Stopper

This unit is designed for the 22V and 22R or for any system to prevent bubbles from entering the sump while adding a reactor for chemical filtration. Unit comes standard with a sponge to mechanically filter the water and prevent bubbles from entering the sump and can be filled with Phos-Guard or pelleted carbon.

44V Magnum Skimmer

The 44V Magnum Skimmer uses a 700gph intake venturi and comes complete with pump, ex-large collection cup, and hook up parts. The injection molded cup, clear conical neck, 4.5" diameter body, and 24" height produce optimum skimming on systems up to 300 gallons. This is the perfect skimmer for advanced reef tanks and heavily loaded fish aquariums. Use in any sump or trickle filter with adequate space. This unit is perfect for the UP2000 filter. The drain should be run into the Model G of the UP2000 filter which will add chemical filtration and prevent all bubbles from entering the aquarium. The Model G Reactor can be purchased separately to use with other filter models. The 44V Magnum has o-ring seals so it can be used outside the filter and drained back into the filter with some modifications. Instructions for external use are provided upon request. Dimensions: 6 x 24".

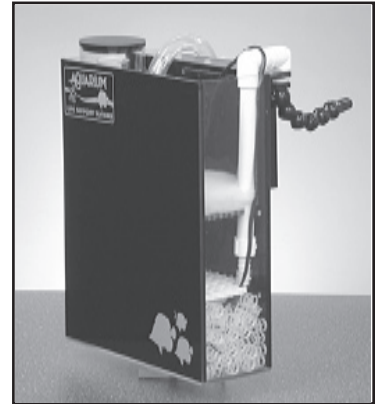

#AL3489

UP100/PS COMBINATION SIPHON BOX AND PROTEIN SKIMMER

The UP100/PS is a great filter and protein skimmer combination for a small saltwater aquarium. Special features of this unit make it completely unique to skimmers in this category. The inner black box surface skims aquarium water then water is protein skimmed with a large venturi skimmer that has it's own venturi pump. The skimmer chamber has room for most submersible heaters. A separate pump (included) returns the water to the aquarium through an Advanced Return. Water is passed over fine filter padding removing bubbles and debris then through two more media chambers before returning to the aquarium. The UP100/PS can be easily modified for use as a siphon box by adding a one inch tank adapter to its bottom. This combination siphon box/protein skimmer is adaptable to any changes you make to your system over the years. Flow rate is 200gph.

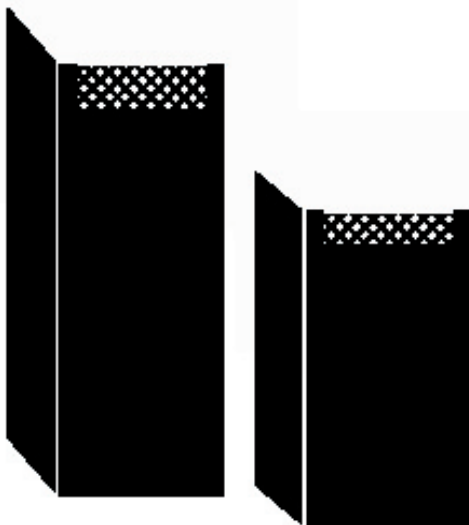

Dimensions: 12 X 4-1/2 X 15-1/4"

UP100/PS
#AL8468

CORNER OVERFLOW BOXES FOR DRILLED TANK ASSEMBLY

#AL2216

These 6 x 6" overflows come with our two standard "Easy Clean" screen slots and are cut to your height specifications. We recommend having them made 1/4" shorter than the underside of the tank trim. This provides a safety overflow if the screens are not cleaned and became clogged. The corners of the overflows may need to be trimmed to allow for silicone seams in glass tanks. Mount unit to clean glass with aquarium silicone. Place silicone on the edge of the overflow and mount, pressing the the unit firmly into the corner of a clean, empty aquarium. Run an additional bead of silicone on the inside of the box and on the outside and clean accordingly. Refer to the silicone instructions for drying time prior to exposing to water. 3/4 " long, 1/4 " wide routed slots.

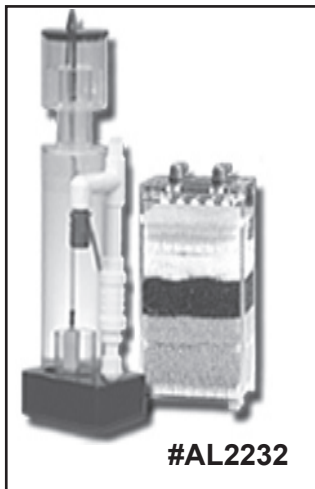

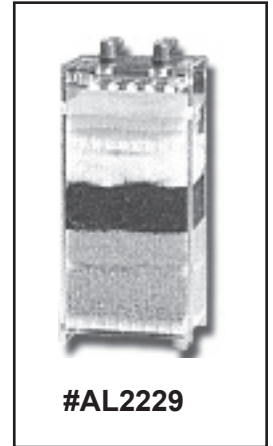

- We can not be responsible for prefilters that have been cut to your specifications and do not fit.

REACTORS

REACTOR MODEL G

This reactor is designed for use in the sump and is powered by either a small powerhead or by draining a protein skimmer into it. It is perfect for preventing bubbles created by protein skimmers from entering the sump of the filter. It boosts biological, mechanical, and/or chemical filtration depending on how it is packed. The Model G is included with all UP2000 filters. Special pricing is available on Model G Reactors purchased with Aquarium Life Support Systems Protein Skimmers. In addition, an optional lid is available on reactors for use with protein skimmers.

Dimensions: 6 x 4 x 12".

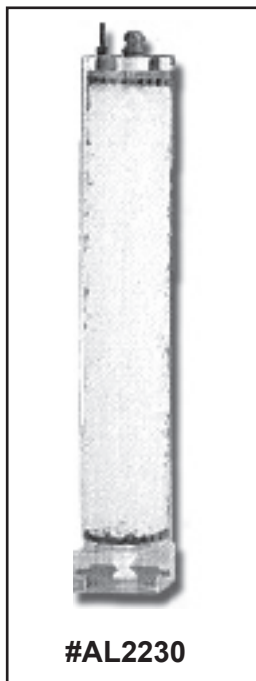

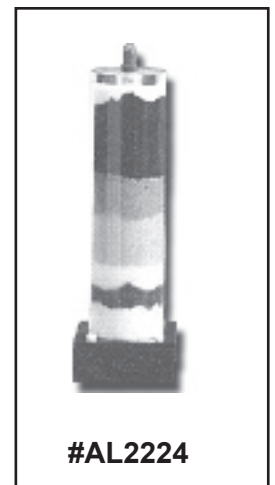

REACTOR MODEL G and SKIMMER PACKAGE

As a special promotion, we are offering the Model G Reactor at a reduced price if purchased with any Aquarium Life Support Systems Protein Skimmer. The Model G Reactor in this package is fitted with a high flow lid for skimmer use. Same great features as the Model G Reactor.

REACTOR MODEL P

The Model P Reactor is a pressurized reactor placed in the sump and run by a powerhead or small pump. It is designed to be used with media that work best under pressure. No water can bypass the unit making it ideal for chemical media like carbon, phosphate and nitrate removers and resins.

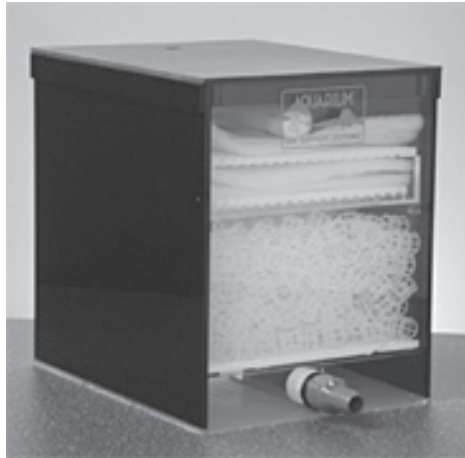

Dimensions: 3-1/2 x 12".

OXYGEN/OZONE REACTOR

This pressurized reactor is great for adding ozone to systems, increasing biological filtration or for increasing dissolved oxygen. The unit will add up to 30 gallons of handling capacity to any system when used for increasing the biological filtration capacity. Can be used both in and outside a sump. This reactor is best used in a sump but can be used outside the sump of a filter.

Dimensions: 3-1/2 x 22".

#AL2801

THE MINI BEAST

The Mini Beast is a “true trickle filter” for ponds. Unlike any other filter in the pond industry, this work of art is equipped with patented plastic media, built from cast acrylic, comes complete with drip trays, easily and inexpensively discarded dual pre-filters, a spray bar, 1” inlet and outlet, and a safety overflow. This unit easily handles any average pond. Combined with a quality pump, an Aquarium Life Support Systems Intake Screen, and an Emperor Aquatics UV Sterilizer, we can say you will have a clear water experience. This ‘little brother’ of the Pond Beast is more easily hidden and handles ponds to 2000 gallons. Requires 350-500 gph of flow.

Standard Features:

- Easy, above-ground installation & maintenance
- High surface area for biological filtration
- Increased oxygen levels
- Higher redox potentials
- Flow rates to 800gph
- Safety overflow
- Ample room for filter media
- Easily supports UV sterilizers & filter pleats
- Lifetime Warranty

Specifications:

Dimensions: 16 x 12-1/2 x 15-1/2”

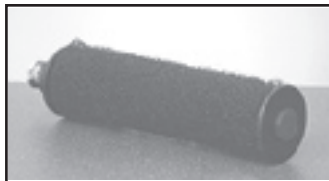

Inlets: (1) 1”

Outlets: (1) 1”

Handling capacity: 2000 gallons

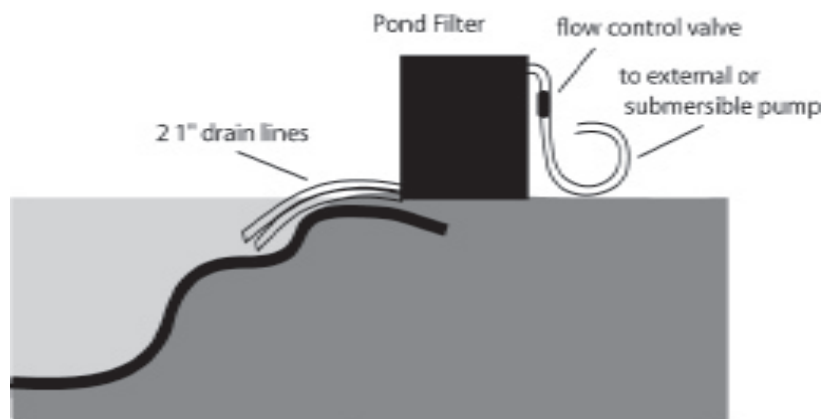

Recommended Flow Rates: 800gph

MINI BEAST & INTAKE PACKAGE #AL8475

Purchase the Mini Beast and Intake Screen at the same time and get special pricing on this great combination of filters.

THE POND BEAST

#AL2800

The Pond Beast is a “true trickle filter” for ponds. Unlike any other filter in the pond industry, this work of art is equipped with patented plastic media, built from cast acrylic, comes complete with drip trays, easily and inexpensively discarded dual pre-filters, a spray bar, 1” inlet and two 1”outlets and a safety overflow. Simply, this unit easily handles any pond.

Combined with a quality pump, an Aquarium Life Support Systems Intake Screen, and an Emperor Aquatics or Danner Mfg UV Sterilizer, we can say you will have a clear water experience. For extremely heavily loaded large Koi Ponds check out our Ultimate Koi Pond in the Pond Solutions and check out adding a Bubble Bead Filter to the most efficient form of biological filtration - the Pond Beast.

Standard Features:

- Easy, above-ground installation & maintenance
- High surface area for biological filtration
- Increased oxygen levels
- Higher redox potentials
- Flow rates to 1200gph
- Safety overflow
- Ample room for filter media
- Easily supports UV sterilizers & filter pleats
- Lifetime Warranty

Specifications:

Dimensions: 22” X 12” X 22”

Inlets: (1) 1”

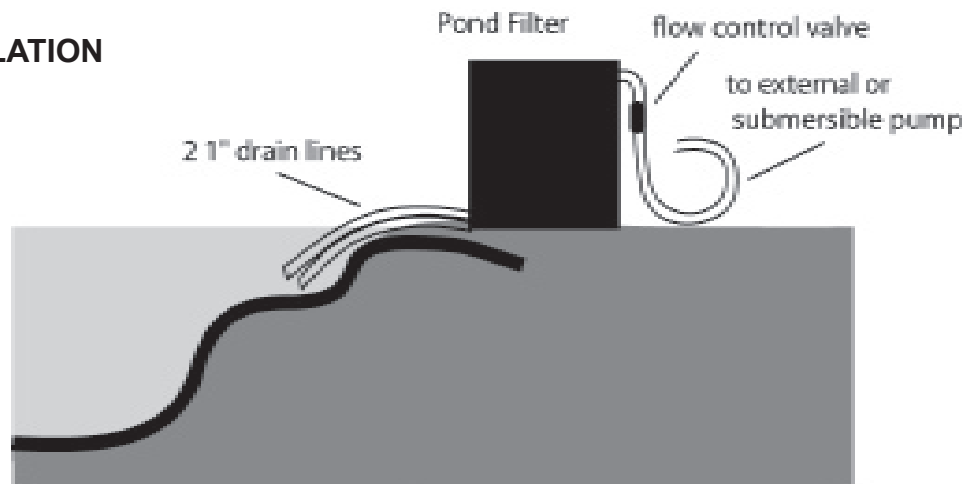

Outlets: 2 1”

Media capacity: 20 gallons

Handling Capacity: the most demanding large ponds

Recommended Flow Rates: 750-1200gph

AniMate Filters

See full descriptions and photographs of all AniMate products at www.aqualifesupport.com

AniMate is a good company with very reliable products. The pond filters, particularly the UV units, are an easy sell. You can be confident recommending any AniMate product.

Fish Mate Automatic Aquarium and Pond Feeders

AniMate's versatile feeders dispense food slowly and reliably. The F14 aquarium feeder can be mounted on the aquarium hood, on a condensation tray or on the edge of the aquarium with the brackets provided.

For ponds and large aquariums, the P21 unit will dispense food slowly over a 5 hour period. The large rotating hopper typically holds sufficient food for 21 days' use. Fully weather-proof, the unit may be mounted on a pole by water's edge or suspended over the water.

Compact UV + Bio Pond Filters

Revolutionary design combining ultraviolet clarification and biological filtration. Guaranteed crystal clear water at a great price.

Easy to replace bulbs are held above the water to improve safety, eliminate scaling, quartz tube replacement and frost damage associated with conventional UV sterilizers.

Sizes available for small to large ponds.

Pressurized Pond UV & Biofilter

Powerclenz auto cleaning technology lets you just change a valve and the filter flushes itself. Maintains clear and healthy water and biologically reduces ammonia. This is a revolutionary pressurized filter that is easy to hide in the landscape. Can be installed above or below ground level. Pump is not included.

Stage 1:

Algae Destruction. By slowly passing the single celled algae that cause `green water` in front of U.V.-C light, the algae clumps together and starts to die.

Stage 2:

Mechanical Filtration. Specially developed, profiled filter sponge pads will trap algae clumps along with other large particles and are easily rinsed for regular maintenance.

Stage 3:

Biological Purification. After mechanical filtration, the pond water passes through Fish Mate SUPRA Biological Filter Medium, possessing over 100 times the biological surface area of conventional plastic media. The specific structure of SUPRA enables rapid growth of aerobic bacteria resulting in removal of lethal ammonia and nitrite.

Finally . . . a break for the independent retailer!

Water Conditioner

The best water conditioner out there!
This All-In-One formula
does the job of 2 products!

Not sold to Mass Retailers

Promotes Healing • Replaces Slime Coat
Removes Chlorine, Ammonia, and Chloramines
Detoxifies Nitrite and Heavy Metals
Adds Essential Electrolytes • Boosts Alkalinity
Works Instantly

Get your customers back to your store! Offer discounts on 4oz and 16oz AquaLife Complete you refill from 1 and 5 gallons sizes. More profit for you - savings for your customers.

AquaLife Complete™ is the most advanced all-in-one water conditioner and stress reliever on the market. Specifically formulated for the hobbyist with a serious commitment to keeping livestock thriving and healthy. AquaLife Complete™ is concentrated to deliver twice the results of other conditioners while reducing the chance of illnesses associated with stress.

Free shipping on 4oz and 16oz \$350.00 order after discounts

Aquarium Products

See full descriptions and photographs of all Aquarium Products products at www.aqualifesupport.com

Aquarium Products is one of the oldest suppliers of medications in the industry. Both Clout and Furnace are unmatched in performance.

Aquari-Sol - Aquari-Sol is the solution for new fish. Relieves stressful conditions brought on by temperature changes or an outbreak of disease. Cures Ick, fights closed fins and body fungus. Safe for all freshwater tanks and most aquatic plants. 3/4oz treats 400 gallons. Use as weekly tonic for prevention, when adding new fish or doing water changes.

Quick-Cure

Cures "ick" in two days. Prevents the spread of Lymphocystis to other fish. Excellent in the treatment of fungus - where white cotton-like fluffs are apparent. The special formulation is safe for scaleless fish like Clown Loaches. The product is safe for both salt and freshwater but not invertebrates and it will have a mild

Furanase

This anti-infective agent is nontoxic to plants and other water life. Controls gram-negative/positive infections. Wide spectrum treatment for Columnaris - mouth fungus, tail rot, cotton wool disease and Black Molly disease. Absorbed through the gills and skin and distributed through the blood, far surpassing many antibiotics.

Gel-Tek Ultra Cure BX

Ultra Cure BX helps to control internal and external bacterial infections such as septicemia, kidney disease, wasting disease, and bacterial enteritis. It also reduces secondary infections arising from sporezoan diseases such as neon tetra disease (Pleistophora). Ultra Cure BX reduces the effects of infection from flavobacterium columnare and fin rot that results in ulcers and open soars. Gel-Tek's Ultra Cure BX contains fish pheromones to entice and enhance feeding behavior without clouding the aquarium water. Safe for all freshwater and saltwater fish. 4 ounce bottle.

Decorations

Aquarium Products has introduced a line of military ship and aircraft replicas that will add interest to any saltwater or freshwater aquarium.

Aquarium Systems

See full descriptions and photographs of all Aquarium Products products at www.aqualifesupport.com

Books

These books are still a great quick overview and easy reference for stores to hand out. Great for first timers.

Maxijet Powerheads

Probably the best built motor ever used for a powerhead. They are reliable and have plenty of features and are not sold by mass merchants.

Millennium Multi-Filters

The aeration feature alone is worth buying this filter. One of our favorite filters. The pads are efficient and reliable. Traditional filters do not aerate enough - a venturi valve mixes air with water to increase gas exchange.

Seaclone 100 & 150 Protein Skimmers

The Seaclone has been redesigned and now is available in a larger size. Tornado-like motion inside this skimmer removes organic wastes from your aquarium. The design is simple and user-friendly. Requires no additional air stones and is more efficient than air-driven skimmers. Functions as either an external hang-on or internal sump model. Includes a Maxi-Jet-PH pump for aquariums up to 100 gallons. New snap fittings for greater reliability, easier cleaning. New molded return spout for added unit support. New air injector for quick, easy, precise adjustment.

Test Kits

For reliable, accurate water testing, we recommend FasTest kits. Every dealer should stock them as an upper-end test kit. The transparent color chip comparator permits more accurate color matching than printed paper color types, and the durable wide-mouth holder is easier to use than any other kit available. New packaging!

The NEW Visi-Therm Deluxe Submersible Aquarium Heater

For years, the name "Visi-Therm" has been "clicking" with consumers. Superior quality, peerless performance and proven reliability have made it America's #1 choice in aquarium heaters. Now there's the Visi-Therm Deluxe - an advanced-design, fully submersible powerhouse. . . the next important step in aquarium heating technology. Every Visi-Therm Deluxe is CSA listed. . . designed to exacting standards for extended submersion and operational safety.

**Table-Top Glass Aquariums**

The bottom line . . . if you don't have several of these unique little tanks on display, you're making a mistake. A tank, some live plants, and a betta - instant sale! Your customers won't find these quality yet affordable gems at mass merchants.

Azoo has created a contemporary style for displaying fish that is perfect for home or office. These unique glass aquariums are ideal for setting up a natural ecosystem. Made for assortments of live plants and a betta fish, these aquariums give a relaxing and harmonious visual effect. Custom design compact halogen lights clip on the side of the glass and have a flexible hood for the desired brightness. Quality accessories that aid in set-up and maintenance are sold separately.

**Twin Calcium Reactor**

Compact in design, this highly efficient reactor completely eliminates the need to add two-part buffer/calcium chemicals to reef tanks. It can be mounted in-sump or externally. Calcium reactor includes carbonate media, hanging brackets and silicone connection tubing. Suitable for tanks up to 450 gallons. Recommended flow rate is 13 gph.

Plant Fertilizer

An excellent slow release fertilizer for the substratum of aquariums. It provides balanced daily nutrients for water plants in a formulation easily absorbed by the roots. Azoo Basic Fertilizer is made from quality condensed inorganic compounds to meet the variety of demands of water plants.

GREAT CASE PRICES AVAILABLE!

Boyd is one of our oldest and best selling lines. ChemiPure has no equal and we recommend it in all our filters. VitaChem products are excellent vitamin supplements. They should be - Boyd was one of the first companies to formulate them.

Vita Chem Marine and Vita Chem Freshwater

A completely new concept in vitamins and nutritional supplements for marine and freshwater fish. After 10 years of research by a think-tank of researchers like John Noble, noted marine researcher, Boyd enterprises introduced the most effective environmental vitamins ever offered in the aquarium trade. Vita-Chem will increase growth, produce intense natural colors, restore appetite, help regenerate fins, increase disease resistance, and stimulate breeding.

Use it on San Francisco Bay freeze dried foods for sick tanks. VitaChem soaked foods are great as part of fishs' normal diet to promote color and reverse the effects of lateral line disease.
4 and 16oz

Chemi-Pure

This is simply the best carbon resin blended product on the market. Great packaging, great performance, and a name customers will know. Chemi-Pure comes in filter bags ready for use. It will remove metals, proteins and many impurities from your water that would otherwise prevent a stable environment. We prefer this product over ChemZorb, and when it is used, you will notice the difference in your systems. No phosphates and negative ion control. Formulated for the marine and serious freshwater aquarist.

CALL for quotations

Florida Crushed Coral, Geo-Marine Formula

#1 in America. The only crushed coral with aragonite, which provides up to 25 times the buffering power of other crushed corals. Special blended high surface area substrate with 40% more surface area than other brands.

Sea Flor Special Grade Reef Sand

#1 in America. The only crushed coral with aragonite, which provides up to 25 times the buffering power of other crushed corals. Special blended high surface area substrate with 40% more surface area than other brands.

Arag-Alive Special Grade Live Sand

Contains specially selected strains of live marine bacteria to rapidly cycle your tank! More than 12 million heterotrophic bacteria per pound. Unsurpassed buffering capability. Removes nitrate, nitrite, ammonia, and other wastes. Maximum surface area, up to 10,000 sq in of surface area per cubic inch. High uniformity coefficient prevents biofouling. Supports the proper pH of seawater with the fastest reaction time. Creates a natural biological balance to discourage nuisance algae growth.

Aragamight

the power of araganite, ground to 10 microns, for ultra high surface area, provides flash remineralization of purified water or RO water as top-off water. This non-caustic powder supplies both calcium and carbonate buffer, a full suite of natural trace elements with no ionic residuals or by-products. Each jar remineralizes over 300 gallons (1/2 teaspoon per gallon.) For use in reef tanks and cichlid tanks.

AragaMilk - liquid araganite

Kon Tiki

1/4" to 1/2" diameter freshwater pebbles with black to grey tones mixed with some clear gravel.

3343 Mvntt Ave. Knoxville, TN. 37919---865-588-0108 FAX 800-237-9611--www.aqualifesupport.com--email cs@aqualifesupport.com

Danner has transformed itself into one of the best aquarium and pond pump companies in the market today. Always providing great service and reliable products make Danner an ideal line for pumps and pond supplies. All Danner pumps now carry a 3-year warranty. Aquarium pumps and ponds are the same except for power cord length -Mag Drive has a 10' cord and PondMaster has an 18' cord. We offer case quantity price breaks on pumps - ask for details.

PondMaster pond filters are great for small to medium ponds and installation is quick and easy. Replacement pads bring customers back again and again.

Mag Drive 700 Pump

Pond Filter Replacement Media

PondMaster 1500 Pond Filter

Danner Submersible Ultraviolet Lighting

- completely submersible ultraviolet Clarifier/Sterilizers
- 'glowing monitor halo ring' shows lamp is working
- can also be placed outside the pond
- blue halo light confirms operation
- unique vortex flow design increases water contact time
- 9000hr lamp, quartz watertight sleeve, transformer, 18' grounded power cord, and barbed intake and outlet
- great value along with ease of use

Marine Aquarium Handbook- Beginner to Breeder Revised by Martin Moe

This is **the** basic book on keeping marine aquariums. The Marine Aquarium Handbook takes the hobbyist from “beginner to breeder.”

- Over 140,000 copies of the first edition in print
- New edition expanded by 144 pages
- Now includes the new reef technology, an enlarged disease and treatment chapter, a detailed troubleshooting guide, additional breeding information, and much more.

If someone had to pick one book, this is the one.

Complete coverage of

The Aquarium

The Water

Filtration

The Biological Filter

Physics and Chemistry

Setup and Maintenance

Fish Selection

Introduction and Quarantine

Disease and Distress

Foods and Feedings

Breeding Marine Fish

Green Turtle Publications

Biotip

For the marine aquarist, Biotip promotes and protects the natural metabolism of living cells in seawater aquariums. Contains only those biological substances as are present in natural seawater. This is important because many companies come up with "miracle cures" that are not present in the ocean and can actually cause pollution problems in the aquarium. Short list of vitamins are A, B1, B12, C, E, H, PP, Mesoinositol as well as amino acids, glycine, leucine, tryptophane and L-tyrosine. There is no product like it on the market. 200ml and 1000ml sizes

Miratip Trace Elements

Replenishes all positive trace elements otherwise consumed by seawater aquarium inhabitants. Once added, the water becomes amazingly clear, and the true colors of the fish come out in their brilliance. Product is much safer than competing products and does not replenish trace elements beyond what are found in the ocean or contain the ones that are poisonous to marine life. Twice the normal portion is still harmless to aquarium inhabitants. Don't try this with any other trace element on the market. 200ml and 1000ml sizes

Carbo Plus CO2 System For Plants

Improves plant growth in your aquarium. This is the most technologically advanced way to add carbon dioxide to your aquarium. Introduce CO2 just by plugging it in. For aquariums up to 130 gallons. It's less dangerous than other CO2 methods and definitely less hassle. Just replace Carbon bar when the Carbo-Plus tells you.

Carbo Plus Carbon Block Replacement

Replacement carbon block for Carbo Plus Unit.

Calcium Marin Plus

This product renews the natural buffer capacity of aquarium water and supports the maintenance of stable pH. One measuring spoon (included) of this product will increase the calcium by about 34 mg/l while causing no adverse effects on the pH. Measure calcium weekly to determine dosage needed. 500g, 1000g, 5000g sizes

Hydor

See full descriptions and photographs of all Hydor products at www.aqualifesupport.com

ARIO 4 COLOR Aquarium Aerator

ARIOs exclusive oxygenating technology together with a super safe illuminating system vividly colours the bubbles in your aquarium.

ARIO Color adds great decoration and can also become a night light in any aquarium. Ideal also for childrens tanks or bowls in their rooms.

The distinctive assembling, the design and the innovative technical solutions used for ARIO Color guarantee incredible quietness, unparalleled by traditional external air pumps that have vibration problems.

Manufactured following the highest international safety standards, ARIO Color is easy to install and needs simple maintenance.

THEO UL Heater 50W - 300W

Features: The Hydor Theo heater line features PTC patented thermal technology which makes it among the safest aquarium heater lines on the market. UL listed by design, not by the use of accessories. Made from specially engineered shatterproof glass which, while not unbreakable, is designed to resist breakage in most normal aquarium situations. Highly accurate due to the use of precise micro-switch technology. For use in freshwater and marine aquariums. Two year guarantee. The 50W & 100W models, at 7" & 8.9" respectively, are among the smallest sized heaters on the market.

CO2 Green NRG Natural Plant System

Healthy and luxuriant growth of aquarium plants is guaranteed by the presence of carbon dioxide. Normally the simple movement of water by pumping or filtration systems causes the elimination of carbon dioxide through the water surface. Carbon dioxide is necessary for completion of photosynthesis. Plants without carbon dioxide lose strength, fade color and eventually die.

Hydor's CO2 green NRG Exclusive solves the problem of low carbon dioxide, is easy to use and has a unique diffuser. Maximum efficiency for visible results fast.

Jungle

One of the oldest and most recognizable names in the aquarium industry.

See full descriptions and photographs of all Jungle products at www.aqualifesupport.com

SeriClean

It is amazing how frequently people work harder than they need to. This helps clean everything and cuts labor in half. Stores should not be without it. This is an easy sale to customers who hate cleaning those crusty aquariums and want something developed to safely ease this burden. Safe and sure way to clean all aquariums, artificial plants, ornaments, filters and accessories. Use on the outside of aquarium glass to keep tanks resistant to fingerprint smudges. Leaves no toxic residue. 2oz, 8oz, and 1gal.

Start Right - Crystal and Liquid

The original and still the most complete water conditioner for aquarium use today. This world famous product stimulates fishes' natural slime to protect from the harmful effects of shipping and handling. Instantly removes chlorine, neutralizes copper and other heavy metals and guards against secondary infection. The only crystal on the market. No artificial slime enhancers are needed with Start Right. Crystal in 2.5oz, 10oz and 20oz. Liquid in 4oz, 16oz and 9lb.

CO₂ Fizz Factory with CO₂ Fizz Tabs

An affordable source of CO₂ for aquatic plants. Increases carbon dioxide in aquarium water for plants. Easy setup and treatment schedule. Great for aquariums up to 40 gallons. Good supplemental carbon dioxide source for your aquatic

plants. The CO₂ Fizz Factory makes it easy, and the only thing you and your fish will notice is the lush jungle of greener, healthier aquatic plants. Includes 16 CO₂ Fizz Tabs. Refills available in 16 and 100 count packages. Sample treatment schedule assists in determining frequency of use. Portion of purchase benefits The Rainforest Alliance.

Net Soak

Sterilizing and cleaning nets is so important. Customers should be told to keep nets clean and stores should do the same. This will prevent net hardening and disease transfer. Let customers know you care about the livestock. This is the best product for this application on the market. Jungle has addressed a problem again! 2oz

Aquatic Plant Tabs

Continually feeds potted pond plants for up to two weeks. Contains essential nutritional elements that keep pond plants vibrant and thriving. Low level phosphates hinder increased algae blooms. Special formulation limits the potential for toxic buildup of heavy metals. 25, 65, 130 tabs

Aquarium Salt

This is the finest aquarium salt available in the industry. Pure and clean aquarium salt should not be forgotten for treating freshwater disease and relieving stress. All livebearers, goldfish, and cichlids will benefit from its use. Use from 1-5 parts per thousand depending on application and use. Sealed jar with easy dispensing lid and instructions make this an attractive package. 16oz, 2lb, 9lb.

Kent Marine

See full descriptions and photographs of all Kent Marine products at www.aqualifesupport.com

Tech CB Ionic Calcium

Part A and Part B

This solution is half of an ionically balanced, complete calcium and alkalinity control system for all marine systems. When used together in equal amounts Tech CB raises both calcium and buffer level. Parts contain both cationic calcium (calcium carbonate) which leaves an ionic residual similar to sea water. 16 oz treats 1900 gallons.

pH Control Minus & pH Control Plus

#1 in America. The only crushed coral with aragonite, which provides up to 25 times the buffering power of other crushed corals. Special blended high surface area substrate with 40% more surface area than other brands.

Reef Carbon

High tech pelletized carbon designed for aquarium use! Pore size of 10 to 2000 Angstroms - perfect for large organic molecule absorption. Contains no phosphates to spur unwanted algae growth. No other aquarium carbon comes close. Use less of this carbon and still get better results. This carbon is tremendously efficient - a great value. Rinse well under fresh running tap water. Sizes: 1qt, 2qt, 4.5lb, 25lb.

R/O Right

This product provides proper water chemistry and electrolyte balance in reverse osmosis and deionized water for freshwater tanks and saltwater mixes. Great for discus tanks to fine-tune hardness. This product prepares reverse osmosis or deionized for fresh and saltwater water environments without having to add tap water. Powdered formulas will treat more than inferior liquid products made by other companies. 100g,

Freshwater Essentials

Replaces biologically important trace minerals that are used by fish and plants then removed through filtration in freshwater aquaria. Will enhance colors, increase vigor and overall health.

Contains no detrimental heavy metals, phosphates, silicates or nitrates, gluconates or other sugars. 8oz. 16oz liquid products made by other companies. 100g, 16oz liquid, 250g, 1000g, 4kg.

Liquid Calcium

Very strong liquid calcium chloride solution - the type of calcium recommended by Stephen Spotte in his new book - to be used in place of Kalkwasser, or with Kalkwasser to provide calcium to corals, calcareous algae, hard tube worms, clams, snails, etc. May be added directly to the tank at rate of 1/4 teaspoon per day for each 50 gallons of tank capacity. Contains no gluconates, lactates, other sugars or dissolved organics to pollute your tank! An 8 oz. bottle will treat a normally stocked 50 gallon aquarium for 6 months. 8oz, 16oz and 64oz.

Kordon

See full descriptions and photographs of all Kordon products at www.aqualifesupport.com

This was the first company to have synthetic slime coat protection. They still use a better grade chemical for this than anyone else. Why use unproven "aloe vera-organic" products when NovAqua is proven and the first?

AmQuel

Protects aquarium and pond fishes and invertebrates by quickly eliminating three of the most toxic chemicals commonly found in water: Ammonia, Chloramines and Chlorine. 1oz, 4oz, 16oz, 1gal

NovAqua

Premium quality NovAqua forms a multilayered, protective skin coating on and in the fishes' skin, adds electrolytes needed for proper osmotic balance, removes chlorine, detoxifies copper and other heavy metals, and helps stabilize pH and balance alkalinity. It is good for both fresh and saltwater. 4oz, 16oz, 1gal, 5gal

Liquid Calcium

Controls Oodinium (velvet) diseases. This product is also effective in the control of the external infection columnaris. Acriflavine is also good for open wounds and external protozoan diseases. It will not treat flukes or fungus. This product is compatible with Methylene blue, NovAqua, and PolyAqua. Kordons Acriflavin contains 3.84% solution of Neutral N.F. grade solution that is much safer than other hydrochloride salt solutions out there. 4oz

PolyAqua

- protects fishes skin
- minimizes infection
- aids in healing
- contains B12

This is Kordon's professional water conditioner, formulated by aquarists as well as professional shippers and collectors. PolyAqua combines the effective skin slime coat replacement properties found in NovAqua with a solution of vitamin B12. The slime replacement polymers are more concentrated than those found in NovAqua. It is designed to reduce the chance of disease outbreak and aid in the reduction of stress associated with shipping and quarantine. 1gal

AmQuel+

AmQuel Plus reduces many problems associated with the nitrogen cycle and removing unwanted toxins.

AmQuel Plus does not interfere with the nitrogen biological cycle -- it simply makes nontoxic what is normally dangerously toxic to fish and aquatic invertebrates at every step of the cycle. This also means that AmQuel Plus cleans up the nitrogen-based organics that accumulate and are a problem as the water ages in the aquarium or pond. AmQuel Plus lessens the need for water changes. Note that when testing for ammonia you must use a kit based on the salicylate method, not nessler's. AmQuel Plus will not interfere with pH, nitrite or nitrate test kits.

HydroSponge Filters

- Capable of moving more water than other sponge filters
- Raised off bottom of tank - no dead space
- 1" diameter lift tube allows use of power head without adapters
- Heavier base than conventional sponge filters
- Use with or without an airstone
- Easy to clean - just rinse and squeeze under cool running water
- HydroSponge Filters - The best sponge filter available. Perfect for freshwater tanks, quarantine tanks, breeding tanks, and feeder holding tanks. Provides both mechanical and biological filtration. Aerobic bacteria colonize the sponge providing a bacterial substrate to facilitate the nitrogen cycle. In addition, the HydroSponge traps larger waste particles mechanically cleaning the water without trapping the baby fish.

Crystal Sea Bucket Marinemix

CrystalSea Marinemix offers complete duplication of natural sea water's 78 major, minor, and trace elements contained in one homogeneous blend. Immediate solubility - clears within minutes without insoluble residue. Each lot is blended from the purest grade compounds to exacting standards in Marine Enterprises' own laboratory and consistently meets rigorous quality control standards.

Crystal Sea Marinemix is experience rated.....endorsed and used by hobbyists, retail dealers, public aquaria, universities, and distributors to maintain all types of marine animals.

- Dechlorinator added
- Phosphate and Nitrate FREE!

CrystalSea Marinemix is the salt we use in our test facilities and has for years received our highest endorsement. Sizes: 10gal,

25gal, 50gal and 150gal box. Special drop ship programs are available - ask for details.

Test Kits

The Marine Enterprises Computer Analyzed Color System was developed by using an optical scanner. The computer actually analyzes the exact color it "sees" and provides the necessary data for the exact duplication of that color. All five colors in each test kit are individual colors, not additive colors like those of ordinary offset printed color charts. This system was developed over a period of three years to give the best possible standards for color comparison. Each of the five one-half inch diameter color "chips" is deposited on a special paper. These color "chips" are made from pigments - not dyes. The reverse side of each

chart has concise, easy-to-understand directions and "Important Facts" about each of the chemical tests. The colors in the Marine Enterprises Computer Analyzed Color Systems are equal to the colors in more expensive injection molded plastic standards, and, unlike the plastic models, will resist fading. Master Kits, refills and professional size reagents also available.

Test Kits:

Ammonia Kit for Fresh and Salt
Nitrite Kit for Fresh and Salt
Ammonia/Nitrite Kit
Nitrate Kit for Fresh and Salt
Saltwater pH

Econo Freshwater pH(carded)
Copper Kit for Fresh and Salt
Chloramine Kit
Marine Master Kit - Salt
Freshwater Master Kit

Crystal Sea Hydrometer

The specific gravity is be measured with the levered hydrometer outside of the aquarium. Accurate and reliable.

Advanced Invertebrate Formula 1

Ingredients: casein, spinach, whole egg, vitamins and trace elements.

Advanced Invertebrate Formula 2

Ingredients: fish, casein, whole egg, Atlantic kelp, Pacific kelp, vitamins and trace elements. Sizes: 120ml and 500ml.

Don't help other salt manufacturers stab your store in the back!

You see them every day - mail order house ads selling retail customers salt and other aquarium products for less than you buy them at wholesale.

Do something about it!

Learn about this great salt, buy it and promote it to you customers. Get behind Crystal Sea Marinemix and make more money.

Crystal Sea Marinemix & Bioassay Formula Salts

Take advantage of this exclusive drop ship offer on the world's best salt - use this handy order form and FAX it to 800/237-9611

- complete duplication of natural sea water's 78 major, minor, and trace elements
- immediate and complete solubility - clears within minutes without insoluble residue.
- quality control: blended from the purest grade compounds to exacting standards
- meets rigorous quality control standards mandatory for coral reef species of fishes and invertebrates
- endorsed and used by hobbyists, retail dealers, public aquaria, universities, and distributors to maintain all types of marine animals.
- dechlorinator added
- phosphate and nitrate FREE!

Sold only to Independant Retailers!

Bioassay Formula Features:

- Maintains all forms of marinelife
- Duplicates natural seawater
- Dry, crystalline blend
- Dissolves and clears immediately
- Adjusts ph to 8.3
- Does not contain phosphates, nitrates, silicates or E.D.T.A
- Convenient re-sealable poly bag inside sturdy carton
- Does not contain sodium thiosulfate (de-chlorinator)

Aquarium Life Support Systems introduces the TechnoFlo Bio Waterfall Filter from Marine Enterprises

Take command of your aquarium with the new Crystal Sea TechnoFlo™ Bio waterfall filter. No other waterfall filter combines the silent operation, massive flow rates and ease of use for both fresh and saltwater aquariums.

With rock-solid construction throughout, the heart and soul of the system is the stainless steel impeller shaft with Teflon bushings and powerful, hi-tech magnets – all embedded in the motor housing where the shaft won't warp, rust or crack, ever. This is the secret to its dead silent, reliable, continuous operation for both mechanical and bio filtration.

Combine this with our state-of-the-art filtering using the bio-engineered, research-grade cartridges that are included, and you have the perfect system for a healthy environment for years to come.

5 Models available with price breaks by the case!

New Life Spectrum

See full descriptions and photographs of all New Life products at www.aqualifesupport.com

Explore the quality and variety of Spectrum Foods

The Spectrum line includes a balanced diet for every species. Carefully formulated to match the fish's natural diet in the wild, these foods will produce healthy, vigorous fish. These smart diets will bring customers in again and again.

Spectrum Cichlid Formula

Spectrum Cichlid Formula 5.3 oz by New Life International noticeably increases both color and vigor in marine & freshwater fish. Spectrum Cichlid Formula 5.3 oz features premium ingredients that produce results superior to other pellets, and even specialized fresh food (such as brine shrimp, seaweed, etc) without pollution. These high-density, nutritious pellets help prevent lateral line disease, as well as other ailments related to faltering health. New Life Spectrum provides trace elements present in natural environments, but missing in aquariums. Spectrum Pellets are designed with no dust and will stay in the water for hours without disintegrating, reducing pollution. New Life Spectrum Cichlid Formula 5.3 oz is suitable for omnivorous, herbivorous, and many carnivorous fish. Ounce-for-ounce, New Life Spectrum Cichlid Formula 5.3 oz provides far better nutrition than flake food, and is less-expensive relative to weight. Contains no hormones. Net Wt. 5.3 oz

Spectrum Community Fish Formula

Balanced daily diet for all freshwater fish. These small pellets are made from easily digestible krill and fish meal protein. Slowly sinking pellets keep pollution levels low. Boosts immune system to repel parasites. Guaranteed by New Life to improve your fish's coloration in 10 days or less.

Spectrum Marine Formula Sinking Pellets

Benefits of feeding Spectrum Foods:

- Enhances color naturally without the use of hormones
- Improves fish health dramatically even when fed Spectrum exclusively
- Formulated for all fish: herbivores, carnivores, and omnivores
- Relished by a wide variety of fish, including finicky eaters
- Prevents lateral line, hole in the head disease, and fin erosion
- Boosts immune system to repel internal and external parasites
- Maintains water quality by being easily digestible and non-polluting
- An ideal food to use in an automatic food dispenser
- Promotes good growth rate on marine and fresh water fish

New Life Spectrum

Premium Fish Food

Guarantee: "Feed New Life Spectrum exclusively for 10 days, and you will notice enhancement in the color and vitality of your fish, or we will refund your money." (hormone free)

Ocean Nutrition

Shipping is free with a \$250+ order in most areas - ask your sales rep. Frozen foods require a \$5.00 dry ice charge per order. Drop shipment available in all areas.

See full descriptions and photographs of all Ocean Nutrition products at www.aqualifesupport.com

Atison's Beta foods are the perfect replacement of live food. Ideal for the growth and conditioning of the Beta Fish. This food is a totally new concept and cannot be compared with any existing pellet food. Bettas love it! Floating pellets which do not cloud the water. Natural attractants ensure prompt acceptance. Higher survival rate than using live food. Bettas will be more alert and responsive. Fins and scales will grow stronger and last longer. Enhances the natural color of the Beta.

Atison's Beta Pro
Atison's Beta Spa
Atison's Beta Starter
Atison's Beta Food

Ocean Nutrition has solved just about every food need. From freshwater to saltwater, Ocean Nutrition Frozen Foods are unmatched in quality and packaging, and not one of them is in mass merchant stores. Many of the foods are available in convenient cube packs as well as flat packs. Trigger, Angel and Shark Formulas are recent additions to the specialty foods line and fish love them.

For customers who prefer feeding flake over frozen foods but still want the quality and nutrition, **Ocean Nutrition** has developed a line of dry foods from the exact ingredients as the frozen varieties, but in flake form.

For algae eating saltwater and freshwater fish, check out the Seaweed Selects line. Attach a sheet to the glass and watch the feast begin. Koi love it too!

all Oscar products at
www.aqualifesupport.com

The Pro Series Surface Skimmer Over-Flow is designed to work with the Pro Series SW Filters and most other sump filtration systems. This uniquely designed over-flow box provides optimum skimming, removing aquarium surface contaminants and also increasing surface gas exchange. The patented over-flow system can be adjusted to only allow 1/4 of an inch of aquarium water to back drain into the filter in the event of electrical power loss. The Auto Aqua Dispenser is a perfect addition. This gravity fed water replacement system compensates for evaporation, adding make-up water slowly back into the system.

Deco Kits Great for Nano reefs and small freshwater planted aquariums. Provides a modern design only available with the versatility of one-piece construction, delivering an innovative profile with leakproof durability. Ideal for the home or office, this show aquarium offers the easiest application for the hobbyist who demands high-tech performance in a minimalistic environment.

Steller Air Pumps

Silent operation, compact design, powerful motor, long life. One of the least expensive but best performing and reliable pumps available. Sizes: S-10, S-20, S-30, S-40, and S-60.

Surface Skimmer For Filters

Removes organic film on surface water, prevents undesirable biological processes on the surface, and helps improve oxygen exchange.

Aquatic Gardener Tong and Plant Trimmer

New generation tool for tank maintenance. Long-handled planter with scissor attachment for trimming plants. Hand attachment excellent for grabbing and retrieving objects from the aquarium floor. Sizes: medium, 20" large, 27"

Magical Cleaning Rod with interchangeable tools. Scrapes algae, removes wastes, and polishes aquarium surface. Ergonomic grip for comfortable use. **Polisher:** polishes your aquarium with ease, even curved surface by turning polisher 90 degrees. **Shovel:** removes fish wastes, food remnants and other undesirable objects. **Scraper:** removes algae from your aquarium without fear of scratching the surface.

OSI Marine Labs

See full descriptions and photographs of
all OSI products at
www.aqualifesupport.com

OSI is an ideal line of dry foods that can't be found in mass merchants. These foods have great shelf appeal and a size for every need. Formulated from the freshest ingredients and nutritional supplements, these foods are carefully blended to closely match those found in nature. **OSI** has developed a number of specialty pellet and wafer foods as well superior staple foods for freshwater, saltwater and pond species.

New from OSI Labs . . .

pH Buffer Liquid

pH Buffer Liquid improves water conditions for Central/South American Cichlids and aquatic plants. Stabilizes high and low water pH to 6.4 to 6.8 range. Easy to use. Effective for at least 2 weeks under most conditions. Simply place an ampule in the aquarium for a slow release action. 3-30ml ampules, auto dosing.

CO₂ Liquid Fertilizer System

A unique liquid that delivers CO₂ to aquatic plants. Results can be seen in about two weeks. Follow the instructions carefully and place one of the three vials supplied with the suction cup to the aquarium glass. Eliminates costly, hard to control CO₂ cylinders and regulators. 3-30ml vials with suction cup. Each vial treats 20-30 gallons.

CO₂ Liquid Fertilizer System Concentrate

A concentrated form of the fertilizer system described above. 3-30ml concentrate vials with suction cup. Each vial treats 40-60 gallons.

Standard Plumbing Notation

Slip (S) fittings are glued to pipe and may have male or female threads on one end.

All are classified as '**Glue & Thread**'.

Examples: S x S, S x mipt, S x fipt, etc.

All fittings with a barbed end for flexible tubing are classified as '**Insert/Barb**'. Insert fittings may also have a male, female or barb at the other end.

Examples: I x I, I x Mipt, I x Fipt, etc.

slip (S)

glues onto pipe

sp

glues to another fitting

insert (I)

tubing barb

Fipt

female threads

Mipt

male threads

Plumbing Subcategories:

- Glue

Tarpon 50 Sand Filters

This is a high-rate sand filter with Top Mount Multiport Valve. Unique patented process creates a one-piece fiberglass reinforced tank with superior strength and durability. Slotted lateral design provides superior flow characteristics and longer filter cycles for economical operation and back washing. Large drain for fast winterizing. Maximum operating pressure of 50psi. 10-year tank warranty. Six position 1-1/2" high flow valve includes pressure gauge, manual air relief valve with sight glass. A one-piece, trouble-free handle offers easy transition from filter-backwash-waste-recirculate-winterize.

50gpm 225lb of sand required

For pond applications: We do not recommend sand filters on ponds - they clog too quickly. However, the Tarpon is a great housing for plastic media types in pond applications. Can be easily turned into a quick clean back-flush system for a pond when installed prior to a Pond Beast and UV.

**We stock all Rainbow Plastics Mechanical Filters,
Chemical Filter Modules and UV Sterilizers.**

UV Sterilizers

The radiation from ultraviolet light at 2537 angstroms provided inside the Lifeguard Ultraviolet Sterilizer exerts a lethal effect on microorganisms. Keep aquariums and ponds clear and algae-free with these durable and effective units. Can also be used in horizontal applications. Sizes from 8 watts to 240 watts.

Quiet One Pump

The all new Quiet One pump line has been designed to for a range of uses from ponds to aquariums.

- *Exclusive design for proper rotation of impeller*
- *Extremely quiet performance*
- *Removable impellar for ease of service*

Schego Air Pumps

Life in the aquarium depends on the air pump. It must work around-the-clock. Schego is the pump you can depend on over all others. In addition, extremely high pressures and extended life makes Schego the perfect pump for protein skimmers, wooden, and ceramic air

stones; even the deep aquariums. We have been utilizing an M2K3 on a 4ft deep aquarium pumping air through a bubble wand under a piece of coral that absolutely churns the surface of the water. The pump is placed 4 feet below the aquarium on the floor. The airstone has not been replaced since 1986 and, with the exception of replacing the air filters, no diaphragm or part has needed repair. This is a testimonial that speaks for itself. No pump comes close to the silent operation, pressure, and reliable operation this pump puts out for anywhere near the price. The clear case allows easy viewing of pump operation and the filter element is easy to change, extending the life of the diaphragm. Air filters on air pumps can not be by-passed because the base has an efficient seal not found on most pumps. Schego pumps are O-ring sealed like no other pump to prevent this problem. Compare these to Supra prices and see the difference European hobbyists have benefited from for years.

Prima Air Pump, 100l/h

Ideal Air Pump, 150l/h

Optimal Air Pump, 200l/h

Optimal Air Pump WS2, 200l/h - *high pressure version of Optimal pump*

M2K3 Air Pump, 300l/h

M2K3 Air Pump WS3, 300l/h - *high pressure version of M2K3 pump*

Tropical Science

See full descriptions and photographs of all Tropical Science products at www.aqualifesupport.com

Phosphate Pads

A well-known, patented filter pad that effectively removes harmful phosphate. Can be used in filter chambers or placed in the filter sump area. Remove and replace when exhausted. 6"x9" pad.

Phosphate Pad/Inhibitor

This combination filter pad keeps phosphates low and inhibits unwanted algae. 6"x9" pad.

Nitromax Freshwater

Highly concentrated blend of nitrifying bacteria. Quickly cycles aquariums and boosts biological filter after water changes. 24 month shelf life! Sizes: 2oz, 5oz, 14.5oz and 1 gallon.

Nitromax Marine

Bacterial cycling product. The only pure blend of Nitrosomonas and Nitrobacter combined with oxygenating bacteria boosters for saltwater aquariums. Provides much faster cycling times, less ammonia build up and healthier water conditions. Sizes: 8oz, 16oz and 1 gallon.

Tropical Clear

Rapidly clarifies and dramatically reduces maintenance with billions of natural sludge-eating bacteria. Clears particulates like proteins, fish waste, uneaten food and other unhealthy matter. Sizes: 8oz, 16 oz, 2 gallon set.

Complete Care

One-step water conditioner for freshwater. Formaldehyde free. Removes chlorine and chloramine, detoxifies ammonia, replenishes slime coat, detoxifies heavy metals, prevents infection and promotes healing. Enriched with vitamin C for disease resistance, added B complex for stress protection. Sizes: 2oz, 5oz, 14.5oz and 1 gallon.

Aqua Flourish

A unique and effective formula containing 17 antioxidants and aquatic vitamins for outstanding growth. See color and health of fish and aquatic plants improve greatly while using. 14.5oz (treats 1720 gallons)

Amazon Rain

Specifically formulated for hard water to keep soft water fish such as Discus, Tetras, Severums, and Angels. Contains the necessary calcium carbonates, bicarbonates, and trace elements to help maintain a proper low pH and to resist pH changes while softening the water.

Marine Max

The copper and chemical free way to prevent disease in saltwater aquariums. Using pro-biotic bacteria, this patented formula is effective in preventing most aquatic diseases. Invert safe.

Water Quality Sciences

See full descriptions and photographs of all Water Quality Sciences products at www.aqualifesupport.com

Water Garden Cleaner

Reduces pond start-up time by jump starting for pond filtration. Introduces beneficial bacteria cultures to remove sludge and bind organic wastes. Helps relieve cloudy water and leaves ponds clear and healthy. Binds fish waste, uneaten food and other nitrogen compounds that otherwise become pollutants and a food source for unwanted algae. Use each time new fish are added to the system. Improves fish health. Activates and cleans biological filters and improves filter activity. Reduces cleaning intervals. Sizes: 32oz and 1 gallon.

Freshwater Aquarium Cleaner

Excellent additive for new tanks to reduce cycling time by introducing large colonies of beneficial bacteria. Helps break down sludge, fish waste and uneaten food and other nitrogen compounds that otherwise become pollutants and a food source for unwanted algae. Improves fish health. Use each time new fish are added to the system. Cleans biological filters. Reduces waste build-up. Reduces cleaning intervals. Activates and cleans biological filters and improves filter activity. Reduces cleaning intervals. Sizes: 4oz and 8oz.

Marine Aquarium Starter

Specially formulated for the marine environment. Essential for the new tank to reduce cycling time to activate and clean biological filters and enhance filter activity. Matures new tanks. Helps break down ammonia and sludge, fish waste and uneaten food and other nitrogen compounds that otherwise become pollutants and a food source for unwanted algae. Improves fish health. Sizes: 4oz and 8oz.

Power Sweep Powerheads

Unique oscillating powerhead produces wavelike currents in any aquarium. Great for use as a wave maker in marine aquariums. Increases efficiency of undergravel filters. Automatic rotating feature creates greater surface agitation and higher oxygen exchange. Excellent for live plant tanks. Comes complete with venturi aerating feature and with prefilter for use on mini-reefs or just to add current. Sizes: 125gph, 160gph, 190gph, 270gph.

Lighting

German quality linear T-8 bulbs. Great quality at an affordable price. Sizes: 18", 24", 36", 48".

T-8 Coral•Sun Fluorescent Lamp Actinic

These 420nm actinic promote the growth of zooxanthellae algae. Essential for the growth and well-being of all photosynthetic corals and invertebrates. Use in conjunction with Ocean•Sun or Reef•Sun for maximum viewing pleasure.

T-8 Flora•Sun Fluorescent Lamp

These 8500K high intensity lamp with peak emissions in the red and blue regions maximize the photo-biological process in plants. Ideal for freshwater aquariums and live plants. Can be used in conjunction with the Ultra•Sun lamp for maximum viewing and pleasure of your plants and fish. Emission spectrum closely matches absorption curve of chlorophyll-a, promoting maximum photosynthesis.

T-8 Ocean•Sun Fluorescent Lamp 10000k

These 10000K bulbs promote the growth of zooxanthellae algae and are essential for the growth and well-being of all photosynthetic corals and invertebrates. Simulate deeper ocean environments.

T-8 Reef•Sun Fluorescent Lamp 50/50

These 6500K/420nm promote the growth of zooxanthellae algae and are essential for the growth and well-being of all photosynthetic corals and invertebrates. Simulate deeper ocean environments. Also great for discus tanks.

T-8 Tropic•Sun Fluorescent Lamp

These Trichromatic Super Daylight 5500k high intensity full spectrum daylight lamps are ideal for freshwater aquariums and live plants. Economically priced yet long lasting high quality phosphors. Bring out the natural beauty of aquarium fish and plants while enhancing clarity.

T-8 Ultra•Sun Fluorescent Lamp 6500K

These Trichromatic Super Daylight 6500k high intensity full spectrum daylight lamps are ideal for all marine aquariums, reef tanks, and freshwater aquariums where maximum daylight simulation is required. CRI rating of 98 provides excellent color rendition and contrast perception. Balanced coverage of the full spectrum of visible light as well as UVA emissions which stimulates feeding and mating behavior.
